Abstract :	

This proposal on the design and development of an advanced Light Transport Aircraft (LTA) has been prepared with a view to present it to the Technical Advisory Board (TAB) of CSIR and get a formal approval. The final proposal is expected to be placed before the Governing Body of CSIR towards the end of September 1990. The proposal highlights the requirements, the specifications, the definition, advanced technologies and the economics of operation of such an aircraft. The proposal also contains the necessary CSIR proforma duly filled in. Summaries of the NAL-Air Taxi Operators meet and NAL-Industry Meet held recently are included in the proposal for the information of the members.
